**Ka'anapali Beach Club by Diamond Resorts International Partners with
Brownstone Technology Solutions**
BTS provides site-wide integrated CCTV solution for popular vacation destination

(Redondo Beach, CA—June 25, 2009...) Brownstone Technology Solutions' Enterprise Series DVR has been installed at Ka'anapali Beach Club in Maui, Hawaii to provide a site-wide integrated CCTV solution. This is the first surveillance project by BTS as part of a rollout across the United States at many of the resorts owned and operated by Diamond Resorts International.

Jimmy Hunsucker, director of security at Ka'anapali Beach Club, says, "BTS Enterprise DVR system provides us with a great tool for monitoring the security of the resort. The video quality is outstanding and the features of 'Multiview and Control Center' are far superior to those of the old CCTV system. The flexibility of the system allows us to have 'Multiview' on workstations on managers' desks around the resort and not just in the security control room."

The Ka'anapali Beach Club is an extremely popular vacation destination on the island of Maui, Hawaii, with over 750,000 guests per year. Ka'anapali Beach Club is typical of the demanding security environment that resorts can create, and therefore it needed a reliable, state-of-the art surveillance system. Using 'Multiview and Control Center', Brownstone Technology Solutions' Enterprise series DVR and management software, the Beach Club security team now has a single integrated solution that can control, monitor and record high-quality video from all 32 cameras at 30 fps, at D1 resolution. The surveillance system will also provide live feeds to the Diamond Resort International corporate office located in Las Vegas, NV.

The cameras are a combination of BTS's Super High Res. 540 TV Lines domes and vandal domes with Infra-Red IR's. The video is recorded on 2 DVRs with a total of 2 Terabytes of storage providing over 30 days of continuous recordings from all cameras at a full frame rate.

If you would like additional information on the project, or would like more information on Brownstone Technology Solutions, please call 800-241-6808 or visit www.brownstonets.com.
